Guillermo Medel

Fullstack Developer | Vue | Nuxt
Guaymas, Sonora, Mexico

Summary

I'm a full-stack developer with a strong focus on front-end engineering, building seamless, high-performance web experiences. I specialize in Vue.js, Nuxt.js, and Tailwind CSS, and have contributed to the front-end development of large-scale digital platforms. I focus on creating performant, maintainable interfaces that deliver clean user experiences.

Experience

ALM

Frontend Nuxt | Vue Developer

January 2023 - Present (3 years 3 months)

As a Front-End Developer at ALM Media, I have contributed to the development of several high-traffic digital platforms, including Law Journal Newsletters and Law.com. My work focuses on building scalable, high-performance user interfaces while maintaining clean, maintainable codebases.

I played a key role in the rebuild of the Law.com homepage and other major sections, improving performance, usability, and overall user engagement across the platform.

Key Contributions

- Led front-end development across multiple properties, ensuring consistency, scalability, and maintainability
- Contributed to the redesign and rebuild of key Law.com experiences
- Built and maintained applications using Nuxt.js, Vue.js, Tailwind CSS, GraphQL, and Pinia
- Developed internal tooling, including Cypress testing frameworks and AI-driven applications for company products
- Improved development workflows with automated testing using Cypress and component documentation with Storybook

- Collaborated closely with product, design, and backend teams in an agile environment

Universidad Tecmilenio

Course Developer

July 2022 - December 2022 (6 months)

Mexico

As a Course Developer at Tecmilenio University, I designed and developed a comprehensive course on Front-End Development and RESTful API Development using React and Nest.js. The course was built to align with modern industry standards and prepare students with practical, job-ready development skills.

Key Contributions

- Designed and structured a complete curriculum covering modern front-end development and RESTful API architecture
- Created lesson plans, technical presentations, assessments, and hands-on projects to support applied learning
- Developed course material focused on React, Nest.js, JavaScript, and TypeScript
- Ensured curriculum alignment with current industry practices and evolving web development standards
- Collaborated with academic teams to maintain course quality and educational effectiveness
- Mentored students through practical development exercises and real-world project work

Michael Page

Frontend Developer

January 2022 - December 2022 (1 year)

Mexico

As a Front-End Developer for AstraZeneca, I contributed to enhancing the company's global digital presence by developing and maintaining pages on the official AstraZeneca website. My work focused on improving performance, ensuring design consistency, and delivering a seamless user experience across the platform.

Key Contributions

- Developed and maintained website pages using Adobe Experience Manager (AEM) and modern front-end technologies
- Implemented UI/UX improvements to enhance usability, engagement, and overall site performance
- Managed content creation and publishing workflows through AEM to support efficient updates across the platform
- Collaborated with designers, marketers, and engineering teams to align digital experiences with brand and business goals
- Improved SEO, accessibility, and performance through front-end optimizations and best practices

Able Lab MX

Frontend Developer

January 2020 - December 2021 (2 years)

Mexico

At Able Lab MX, I worked on a variety of projects across multiple industries, developing websites, business software, and mobile applications using modern web technologies. My work focused on building responsive, high-quality user interfaces and supporting clients in expanding their digital platforms.

Key Contributions

- Designed and developed front-end interfaces using Angular, Vue.js, and Tailwind CSS
- Built hybrid mobile applications to deliver cross-platform user experiences
- Developed custom business software and web solutions for clients across different industries
- Created the front-end prototype for Reservandonos.com, a reservations platform developed for The Coca-Cola Company
- Collaborated with designers and development teams to translate business requirements into scalable applications
- Improved UI performance, responsiveness, and accessibility across web and mobile platforms
